

A SYSTEM AND METHOD FOR MONITORING INFORMATION  
DELIVERED THROUGH AN ELECTRONIC DELIVERY SYSTEM

ABSTRACT OF THE DISCLOSURE

A system and method are provided for monitoring information delivered through an  
5 electronic delivery system. One method for monitoring electronically delivering documents  
is provided which includes the steps of: creating log files for storing selected data related to  
selected electronic document preparation events; forwarding the log files to a central database  
for storage; and providing access to the log files for retrieval and analysis.
